Of Interest To You

An Intense Love for growing plants, an idle but very fertile piece of land near our home and a severe need in our community lor good nursery stock prompted the beginning of our husiness. Our aim was to meet the needs of our own nearhy vicinity with properly grown trees, shrubs and plants adapted to our soil and climate. Each order, whether large or small, is treated with the same intelligent care as if it were the only order to be looked after.

This unusual, intelligent attention in the handling of Hardy Nursery Stock was so much appreciated by our friends that we were urged to offer them the same facilities in **plants for home and conservatory decoration**. We are pleased, therefore, in being ahle to offer this very carefully selected list of plants to those interested. It offers a suitable

Our Office

plant for every purpose for the lawn, garden, orchard or home, and our customers can secure in one shipment from the same place an entire order.

Our Offices, Greenhouses and Show Grounds, covering several acres, are very accessibly located along South Thirteenth Street below Berryhill. We welcome visitors at all times, Sundays excepted. Take Oberlin or Steelton via Nineteenth Street cars, which pass by Thirteenth and Berryhill Streets within seven minutes after leaving the Square. Our nursery farm is located five miles northeast of the city. Here we have over one hundred acres rapidly being planted with nursery stock.

Our people are thorough, intelligent plantsmen. Both our Nursery and Greenhouse foremen have been trained in the famous Kew Gardens in England, and have had extensive experience in the fruit and ornamental nurseries of Germany and France. Others of our force have had extensive experience on many of the large estates of this country.

Tree Moving, Spraying, Pruning and General Garden Work. We are prepared to send men to do all sorts of expert work of this character, and to undertake the continuous care of lawns, gardens, etc., within nearby access to Harrisburg.

Shipping Season for nursery stock begins about March 1 and continues until May 15. The fall shipping begins about September 1 and continues until the ground freezes. Evergreens, with balls, can be safely moved through almost the entire year, and we are prepared to supply roses and vines from pots at all times. House plants, such as Palms, etc., can be shipped throughout the entire year. Scasonable blooming plants as noted under each item.

Shipments are made by mail, express and freight. Small plants can often be sent by mail. Larger plants, shruhs, etc., should travel by express, and unless otherwise instructed we ship charges collect. A discount of 20 per cent is allowed by the express companies on nursery stock. Large, heavy shipments travel safely by freight. When no definite instructions are given we use our best judgment.

Order Early. Our rule is to fill orders in the rotation received. Order early and insure your stock coming from the largest selection and reaching you at the earliest moment for planting.

Substitution. We warrant our stock true to name and will replace any that may prove otherwise. Late in the season we may be sold out of some varieties and sizes, and unless otherwise ordered we will take the liberty of substituting similar varieties.

Prices. The prices quoted herein are for stock delivered to nearby points or to freight or express companies free of charge. Where crating or baling is necessary, a slight charge is made to cover actual cost. Our responsibility ceases on delivering shipments to the carrying company.

Terms. Cash with order. Except to persons known to us or sending satisfactory reference. Address all orders to

OUR LANDSCAPE DEPARTMENT

To all those contemplating the proper development of their grounds we offer the services of our Landscape Department. Many well-meaning people make the

mistake of occasionally buying a few shrubs or trees and having them planted in their grounds regardless of any definite plan. Our charge for making a concrete scheme for the entire planting can be saved many times, if taken advantage of in the beginning. With a definite plan in view, the customer can then work it out, either as a whole or in part. The same careful attention is given to the customer who has a small city lot to plant that we give to the larger estates, country clubs, cemeterics, factories, etc. We can help you to make your lawn a real picture; to place your vegetable, fruit and cut-flower garden in the proper place; to screen out unsightly places; in short, to get the most

pleasure out of a given area, and with the use of our large trees and shrubs to get the effect at once. Either send us a sketch, giving dimensions, and photographs, or communicate with us and we will arrange for a visit.

EVERGREEN TREES

Like old and true friends, the Evergreens are always the same, summer and winter, and no planting is complete without a touch, at least, of their continuous companionship. As specimens on the lawn, for massing or windbreaks and hedges, some of the fine varieties here offered cannot be surpassed.

EVERGREEN SHRUBS

Like the Evergreen Trees, the Evergreen Shrubs are a very valuable class of plants. As an edging for a mass planting of evergreen trees or a solid mass planting of themselves, they are equally good. The old fashioned box trees, Laurel and Rhododendrons, are among the most noted of the class. On the last named two plants we shall be pleased to quote attractive prices on large lots.

HEDGE PLANTS · LIVE FENCES

The proper selection and planting of a hedge settles the matter of the boundary line for all time. Not only is this treatment more beautiful, but it is far less expensive, needs no painting and very little repairing. We suggest below a list of the best plants for hedge fences, and give the **approximate** cost per hundred feet, using average-sized plants. Smaller plants would require more, larger less; the total cost would be approximately the same. Prices of the separate plants can be found under the listing elsewhere in this catalogue.

DECIDUOUS TREES

Deciduous trees, or those which drop their foliage in the fall, are a necessity in every form of planting, whether it be large or small. There is such a variety in size, shape, foliage and habit that it is possible to obtain deciduous trees for every purpose. Many of them bear handsome flowers and some are noted for their various colors of foliage. Some show their chief beauty in spring, while others require the early frosts to bring their beauty to full perfection.

Ailanthus

Tree of Heaven (Alianthus glandulosa). A beautiful tropical-like tree. One of the fastest growing, attaining a height of 60 to 80 feet, with long sprays of foliage much like sumae. It thrives in smoky places and in soils in which no other tree will grow.

We will supply 5 shrubs at the 10 rate; 25 at the 100 rate; 250 at the 1,000 rate. Our shrubs are well grown, frequently transplanted and our soil produces fibrous roots. It costs us more to handle them this way, but it 's worth it to you if you want results without disappointment.

You can have a bed of Roses like this the first year by planting our strong stock.

ROSES

No garden or lawn is complete without them, and no flower so royally repays for its care. With these varieties in our own garden we have cut quantities of bloom from the middle of May until late in November.

In most varieties we have potted stock, so that shipment can be made safely at any season. We offer all varieties in three grades.

VINES, CLIMBING AND TRAILING PLANTS

For shading porches, covering enbankments, covering the ground under trees or shrubbery, or as screens, shutting out unsightly places, vines are invaluable. They can always be kept within bounds and are exceedingly decorative. We grow nearly all varieties in pots which enables their being transplanted at any season. All are strong vigorous plants fully worth the price.

Aristolochia \$ipho (Dutchman's Pipe) and Hardy Ferns

HARDY FERNS

The joy of the woods is the ferns. Many damp, shaded locations about the home grounds are well adapted for the planting of hardy ferns, and when once established they are a joy forever.

25 cts. each, 25 for 10, 15 per 100. Mixed varieties, our selection, 15 cts. each 1 for 10, 9 per 100.

ADIANTUM pedatum (Maidenhair Fern). 1 to 2 ft. Moist, shaded positions.

ASPIDIUM acrostichoides (Christmas Fern). 1 to 2 ft. Evergreen. Dry or moist soils in shady places.

A. marginale. Evergreen. 1 to 2 ft. Shaded positions, dry or moist soils.

DICKSONIA punctilobula (Boulder Fern). 2 to 3 ft. For open positions, forms large plantations.

OSMUNDA cinnamomea (Cinnamon Fern). 2 to 5 ft. For open or shaded positions, in wet soils.

WOODSIA obtusa. 6 to 12 in. Shady places, in moist soil.

Note that we grow nearly all varieties of vines in pots so that we can make delivery most any time during the season without shock to the plant. For quick covering it is well to plant an annual vine also (see page 55, Cobaea Scandens), while the permanent vine is coming on.

HARDY HERBACEOUS PLANTS

This includes all the fine old-fashioned plants that grew in grandmother's garden, and some new ones just as beautiful. The plants die to the ground each fall but the roots remain alive, and the pleasure of welcoming the old friends each year is always enjoyed.

Plants followed with "S." are suitable for swampy places; "Sh." for shady locations; "R." for rockeries; "D." for dry soil conditions and "C." for cutting.

PRICES

Except where otherwise noted any of the following plants will be supplied in strong clumps at the following prices: Single plants 25 cts., 10 for \$2, 100 for \$15; 5 plants at the 10 rate, 25 at the 100 rate. Write for special prices on large quantities and special selections.

Two Great "Get Acquainted"

Collections

No. 1.-JAPANESE COLLECTION OF ORNAMENTALS

All standard popular plants that will do well in most any soil conditions, need little care, and sufficient to make a good showing in an averagesized city front yard.

- 2 Clumps Japanese Iris. Strong.
- 2 Japanese Peonies. Large size.
- 1 Japanese Rose. 11/2 feet high.
- 1 Japanese Maple. 12 to 18 inches high.
- 1 Japanese Barberry. 1 foot high.
- 1 Clump Japanese Grass. Large.

All of the above thrifty, strong plants, carefully packed and shipped, express paid, for only \$2 cash with order.

No. 2-SMALL AREA FRUIT COLLECTION

That back or side yard can be made far more beautiful and infinitely more interesting with a few trees and berries. This collection is suggested especially for the small yard, and with the introduction of **Dwarf Fruit Trees** in apples and pears, fruit can be picked from the trees the second year after planting. They produce the same quality of fruit as the ordinary tree, but the habit of growth has been so changed by grafting that the trees never attain a height of more than ten feet.

- 2 Dwarf Apples. Early and late varieties.
- 1 Dwarf Pear. Standard variety.
- 2 Standard Peach, Early and Late varieties.
- 1 White Grape. 2-year old.
- 1 Red Grape. 2-year old.
- 2 Red Currant. 2-year old.

All of the above in good, strong, satisfactory stock, not the tree-agent kind, carefully packed and shipped by prepaid express, for only \$3.50, cash with order.

The Two Great Collections for \$5. Order Quick!
